

# CHENYI WENG

 she050623@gmail.com |  linkedin.com/in/wengchen |  mona100421.github.io/chenyi/ | Los Angeles, CA

## SUMMARY

Frontend-focused Software Engineer with hands-on experience building **consumer-facing web applications using React, TypeScript, and modern CSS**. Proven ability to design reusable UI components, manage complex client-side state, and deliver polished, user-centric product experiences. Experienced collaborating across frontend and backend boundaries in a production-style environment. Seeking a **Frontend Software Engineer (University Graduate)** role to build high-impact, user-facing products.

## EDUCATION

### University of Southern California (USC)

Los Angeles, CA

#### M.S. in Spatial Data Science (STEM)

Jan 2024 – Dec 2025

Relevant Coursework: Data Science at Scale, Machine Learning, Distributed Data Processing

### National Taipei University of Business

Taipei, Taiwan

#### B.B.A. in International Business

Sep 2018 – Jun 2022

Minor: Information Management

Relevant Coursework: Data Structures, Operating Systems, Object-Oriented Analysis, Computer Security

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, HTML, CSS

**Frontend:** React, React Hooks, Redux Toolkit, Vite

**UI & Styling:** CSS3, Flexbox, Grid, Responsive Design

**State & Data:** REST APIs, Client-side State Management

**Tools:** Git, GitHub, Figma, Postman

**Backend (Working Knowledge):** Node.js, Express, MongoDB

## EXPERIENCE & PROJECTS

### Full-Stack E-Commerce Platform (MERN)

San Jose, CA

Software Engineer in Ryzlink Corp

Dec 2025 – Present

**Tech:** React, TypeScript, Redux, Toolkit, Node.js, Express, MongoDB, JWT

- Designed and implemented RESTful APIs using Express and TypeScript with a layered architecture (controllers, services, models) to support product management, shopping cart, and user authentication.
- Developed secure authentication and authorization middleware, request validation logic, and MongoDB data models to ensure data integrity and application security.
- Built a responsive frontend using React and TypeScript, implementing core features including product listings, product details, cart management, and protected admin routes.
- Managed application state using Redux Toolkit and custom React hooks to ensure consistent cart and user state across the application.
- Integrated frontend services with backend APIs, ensuring type safety and reliable client-server communication.
- Focused on maintainable code structure, debugging full-stack issues, and improving scalability and developer productivity.

## ADDITIONAL INFORMATION

- Familiar with cloud-based, data-driven product environments and large-scale system constraints.
- Strong interest in ads platforms, measurement, and privacy-aware system design.
- Languages: English (Professional), Mandarin Chinese (Native)
